

॥ त्वं ज्ञानमयो विज्ञानमयोऽसि ॥

School of AI and Data Science, IIT Jodhpur presents
Thar Talk Series: AI and Beyond

in collaboration with
Jodhpur City Knowledge and Innovation Foundation

Wednesday, 25 August 2021
7:00 PM, IST

9th talk

DNA Digital Data Storage

Dr. Emily Leproust

CEO and Co-founder,
Twist Bioscience

<https://www.twistbioscience.com/>

Find out how Twist Bioscience is working to make digital data storage in DNA a reality. DNA has many advantages: It's Nature's permanent data storage medium and can last hundreds of thousands of years; it is dense and compact enough to fit the entire internet in a shoebox; it requires almost no energy - less than a light bulb's worth of power to store a large amount of data; we will always have a way to read DNA; it can be copied easily to make redundant copies and it's easy to encrypt an conceal important data in DNA.
